New Mahamana Express, New Humsafar Express will bring more convenience to the passengers of Madhya Pradesh & Odisha respectively. In Madhya Pradesh, Odisha, Andhra Pradesh investments related to Railway projects have been increased substantially."

Salient Features of the Initiatives Launched:

RailTel and Google brings RailWire Wi- Fi at Sambalpur and Vizianagaram Stations

The Wi-Fi facility for the visitors & rail users of Sambalpur and Vizianagaram Railway Stations has been commissioned by RailTel in association with Google for providing high speed state of the art world class internet experience to the commuters.

The service built over the fiber network of RailTel is designed to offer high-speed broadband like experience to users. Travelers passing through these stations will now be able to easily stream a high definition video while they're waiting, research their destination, download a book or a new game for their journey.

RailTel Corporation of India Ltd., a Mini-Ratna PSU under Ministry of Railways, has taken a lead in providing fast Wi-Fi for the use of passengers at A1 & A category Railway stations. RailTel roped in Google as the technology partner for setting up fast Wi-Fi network initially covering 400 A1 & A category stations. Under this partnership, we had a target of completing 100 stations by the end of December 2016. Surpassing the target, we completed 110 stations by the end of 2016. We now have taken up a target of completing 200 stations by the end of 2017 and as on date 127 stations have been enabled with fast RailWire Wi-Fi.

Odisha-

Stations where Wi-Fi services are available
4
Bhubaneswar, Cuttack, Sambalpur & Puri

Andhra Pradesh-

Stations where Wi-Fi services are available
7
Tirupati, Vijayawada, Visakhapatnam, Guntur, Palasa, Srikakulam Road & Vizianagaram
Stations where Wi-Fi services will be available soon

Anakapalle, Bhimavaram Town, Cuddapah, Eluru, Guntakal Jn., Kakinada Town, Nellore, Rajahmundry, Renigunta, Samalkot Jn., Tenali Jn., Tuni

Pan India-

The Railwire wi-fi service in association with Google is currently available at 127 stations across the country. We have around 6 million users per month across the stations. This year we have plan to extend the service at 200 stations. Apart from this RailTel will start working for providing 200 rural railway stations across India. A Digital Service centre will be set up in these stations to extend digital literacy and various online services to rural population.

Wi-Fi services to passengers are being provided under 'Railwire', the retail Broadband distribution model of RailTel. Designed to offer users the best Internet experience, Railwire Wi-Fi will be available to any user who has a working mobile connection on a smartphone. Railway stations are the places where the cross section of the society is available. This initiative is part of bridging the digital divide & providing high speed access network to all rail users with financial inclusion of Local Cable Operators. Once implemented this shall be one of the largest public Wi-Fi project in the World.

More details about the project is available at <https://www.railtelindia.com/key-projects/station-wi-fi-project.html>

How to connect to access the Wi-Fi network-

The user have to switch on the Wi-Fi mode in the smartphone and select the railwire Wi-Fi network. After the railwire homepage network automatically appears on the smartphone, the user has to enter his or her mobile number on this homepage. The user will get one time password (OTP) code in form of SMS in the message box which has to be entered in the home page of railwire. Users will be able to access high speed internet & can start internet browsing.

About RailTel

RailTel Corporation a "Mini Ratna (Category-I)" PSU is one of the largest neutral telecom services providers in the country owning a Pan-India optic fiber network covering all important towns & cities of the country and several rural areas covering 70% of India's population. RailTel is in the forefront in providing nationwide Broadband Telecom & Multimedia Network in all parts of the country in addition to modernization of Train operations and administration network systems for Indian Railways. With its Pan India high capacity network, RailTel is working towards creating a knowledge society at various fronts and has been selected for implementation of various mission-mode Govt. of India projects in the telecom field.
